The People Vs Muhammad - Psychological Analysis

Synopsis

Is Islam a "religion of peace"? Was Muhammad the true and final prophet of God? Is the Quran the fulfilment of the Bible, and legitimately continuing the traditions of the Judeo-Christian scriptures? Perhaps one of the most audacious, shocking, unthinkable and highly controversial ideas to ever be conceived, *The People vs Muhammad* places the founding father of Islam on trial for crimes against humanity, and to challenge his self-proclaimed authority. With the growing threat of home-grown Muslim jihadist terrorist attacks and the ominous cataclysm of a global holy war, there's no doubt Islam has become a burdensome issue which has our own western governments perplexed. This book series intends to investigate the true ideology of Islam, to ascertain with reason and logic the legitimacy of Muhammad's claim and core teachings of his cult. Throughout this series, author J.K Sheindlin carefully analyses the Quran and the Islamic texts legalistically to expose the shocking truth pertaining to Muhammad's advocacy for: Pedophilia, honor killings, sex slavery, prostitution, racism, extortion, murder, psychological indoctrination, intellectual terrorism, censorship, grand larceny, racketeering, domestic violence, gender inequality, and much more! In this powerful series, the first installment *Psychological analysis* delves deep into Muhammad's past and uncovers disturbing facts which undoubtedly prove to be the origins of his multiple psychopathological disorders. Using entirely the Islamic sources in reference to contemporary psychiatric-medical archives, J.K Sheindlin details Muhammad's extensive catalogue of mental illnesses which include: Psychopathy, Gynophobia, Napoleon Complex, Schizophrenia, Narcissistic Personality Disorder, Messiah-God Complex, Obsessive Compulsive Disorder, Athazagorophobia, Oedipus Complex, Sex-addiction, Pedophilia, and Necrophilia. Furthermore, the author also hypothesizes a convincing argument based on medical science, which debunks Muhammad's first revelation. These external factors being: Volcanic gas inhalation, sensory deprivation, starvation, dehydration, brain damage and Syphilis. Written to provoke a rational response from both Muslim and western readers, the verdict is ultimately decided by the public to determine if Muhammad's claim to prophethood is legitimate.

Spelling mistakes aside - the author did a wonderful job in analyzing how the so-called holy book anchors into the psyche of the muslim - typical or otherwise . . . and you will eventually realize why they do not speak out against the atrocities that have become common place today (Today? They have been happening since 1400 years!) (Also read the Barbary Wars - the first overseas war of the US led by Thomas Jefferson)A MUST read - especially by those whose business is global diplomacy - to understand how to deal with that segment of society and to foresee what works and what is guaranteed to fail despite contractual agreements with the lot.I can keep writing . . . read the book instead!

This book uses the quran and hadiths that are freely available for anyone who has the desire to check them out for themselves. As for muhammad being the 'perfect' man, and the quran the source of information for all things ..I come to the conclusion that both assertions are completely false. This book confirms what I have so far discovered about islam. This book should be read by all those who want answers as to why muslims are so readily inclined to descend into barbarity over trivialities. I believe this book needs to be widely read, especially by muslims who question whether ISIS is really islamic, and if they are behaving as the 'perfect man' proscribes.

What can I say, TRUTH MATTERS! This book exposes the true history and mind set of it's beginnings. A godless cult of war and mayhem not the so called religion of peace they want you to believe they are. A culture that does not have anything in common with Western Civilization.

I purchased several copies of this to review for myself and to give to some friends to review. As stated by other readers, the spelling and grammar errors are numerous and completely unacceptable for a published work. This can have an effect of detracting from the over all legitimacy of the work. The author should fix this in subsequent editions. That being said, the book is full of

useful information and is a good primer for people who have never studied anything about Islam. For those people, they may be extremely shocked at much of what they find. Every non muslim in America needs to become aware of Islam (and many Muslims for that matter) and how it effects them. If you think that it only pertains to Muslims you are dangerously uninformed. This book is interesting, easy to read (minus the sporadic grammer issues) and full of information for which the reader can easily go to the source documents and search out on their own, ie. do islamic religious texts really say that Muhammad married a six year old little girl? Look it up for yourself. I found the 'trial' approach a novel and interesting way of presenting the information, but, weather or not you agree with all of the psychological analysis, the method delivers an enormous amount of well cited information (facts). Spelling and grammar issues aside I am purchasing more copies of The People vs. Muhammad to give to others who are willing to give it a read.

A need to read for all americans. Muslims wake up!

A good book based on facts, about the islamic prophet muhammad. A must-read book for every non-muslim and muslim.

This book should be required reading. Especially to those that are apologetic to the ideology of Islam and keep insisting it is a "peaceful" religion. I say WELL DONE to the author who, in my opinion, is a brave and courageous man. Highly recommended.

Ignore those nitpickers who are focusing on punctuation and spelling. People are being killed by Islam everyday. This information needs to become mainstream. This is an extremely timely book. Read it then share it over and over.
