Customer Reviews

I learned to love math from this book and the Baldor Algebra back in South America. Now that I have reviewed some current math books I can tell the huge difference. Baldor is to the point, plain math concepts and exercises. No graphics, calculators, nonsense philosophy or PC garbage.

Excelente

I studied with this book when I was in school, and now it is my daughter's turn. This is an excellent book for anyone who wants to do great in Math... Highly recommended
