A History Of The Dark Ages - From The Triumph Of Constantine To The Empire Of Charlemagne (Illustrated)

Synopsis

An excellent, massive history covering the period known as the "Dark Ages". Spanning from the rise and triumph of Constantine, through the Fall of Rome and the subsequent collapse of the Western Roman Empire, to the attempted restoration of the Byzantines in the West and the conquests of the Islamic Arabs, culminating in the imperial coronation of Charles the Great and the laying of the foundation of the medieval period. This is a history of war and terror, of faith and ignorance, of the collision of peoples and leaders bent on nothing more than complete conquest and domination. This is the beginning of the Holy Roman Empire, and the beginning of the end for the Byzantines. This is the history of a critical age of humankind, where the light of learning was a tiny glimmer in an ocean of darkness. The seeds of thought that would push the peoples of Europe out of anarchy and chaos and into the feudal stage would be sown by the conquests of a magnificent warrior king, and a holy church that refused to abandon the power it had so skillfully gained. This is a history of...the Dark Ages.

Customer Reviews

It has a ton of historical detail that can get overwhelming but you can skip the detailed parts if you

are so inclined to and concentrate on the historical research which is readable and engaging

I would recommend this book for any who are looking to increase their knowledge of Europe especially Roma and gall in the early stages of the dark ages

so enjoyable, i wish i could read this book much earlier
