My 6 year old daughter is starting to get really interested in playing the keyboard. My wife had one that she gave to her and she has been taking to it very quickly. We purchased this book to help encourage her and keep her interested. So far, she loves it. There are easy songs in the book to build her confidence and the included stickers that you place on the keyboard keys are really cool. This has been a really great purchase, especially at such a reasonable price of less than \$7. Highly Recommended if you have a child just getting into keyboard playing.

The book is simple to use and both my boys 7 and 9 love it. It encourages them to play because the barrier to getting started is very low. Immediate results meant they kept learning and growing and having fun.

Has stickers to apply to the keys to help kids learn the way to correctly place thier hands on the keyboard and lets them play simple songs by following color codes that match the stickers you place on the keys. Great for the \$\$.

I wanted something that would be easy for my 9 and 10 year old kids to learn. This came with colorcoded stickers that can be peeled off later and easy to learn songs. The kids love getting the keyboard down and playing an actual song on it.

This would be a great book for a kid taking lessons or to share with a parent who knows how to read music. But with us it is the blind leading the blind. I had my share of piano lessons as a kid but I'm struggling to understand the teaching method here.

Bought for my grandchild, along with a keyboard. It looks like a simple book for her to follow. I have piano experience, so I needed something we can work on together and I feel this is exactly what I was looking for.

This book is color coded and easy to follow. It comes with stickers for the keys, so that a child can quickly play songs without knowing notes or music.
